ABOUT

Novice UI-UX Designer and enthusiastic web developer. Skilled in HTML, CSS, JavaScript, and expanding into MERN stack. Seeking challenging roles to craft user-friendly web apps. Committed to continuous learning and passionate about development.

PROJECTS

FOREVER AND ALWAYS

2023

A WEDDING PLANNER

I collaborated with three teammates to design and develop a website called "Forever and Always" using a combination of HTML, CSS, and JavaScript. This project provided me with valuable experience in CSS, allowing me to enhance my skills in web design and styling.

SRUTIKARLAKSHMI

2023

A PERSONAL PORTFOLIO

I independently developed a dynamic and responsive portfolio website using React. This website serves as a compelling online resume, showcasing my skills and various projects. During this project, I gained proficiency in React, further enhancing my web development skill set.

MYWEATHERAPP

2023

LIVE WEATHER APP

MyWeatherApp brings you instant global weather updates, seamlessly integrating OpenWeather API magic for effortless and informed weather tracking. Your passport to weather convenience, it transforms forecasting into a delightful journey.
